ABOUT US:

NightWing Enterprises is an internationally recognised provider of professional FileMaker consulting and development services, is a specialist in the design and development of cross-platform enterprise solutions and stand-alone applications and offers FileMaker Certified Developer expertise for FileMaker 7, FileMaker 8, FileMaker 9, FileMaker 10 and FileMaker 11*.

Our Mission:

We aim to achieve excellence and extend the capabilities of FileMaker solutions in every area from the technical design to the user interface. Our mission is the integration of art, design and technology – and we have the diverse skills which are required to deliver this vision.

Our Achievements:

Our team has an extensive track record in deployment of elegant and leading edge solutions. In 2005 our Director of Development received the FMI award for Leadership and Technical Excellence in FileMaker Pro. We are a Platinum member of the FileMaker Business Alliance and have made significant contributions to public discourse on FileMaker – as well as to specialised high-level technical publications. Our Director of Development is also author of the acclaimed FileMaker Pro 10 Bible (Wiley, 2009).

Our commitment to excellence is acknowledged internationally, our innovations are used by developers throughout the world and our services have been sought for jobs ranging from education, engineering, research and medical applications through to systems integration, process and workflow management and corporate data systems.

Our Clients:

NightWing Enterprises has an international client base, with current and recent clients on all major continents. Our interface and application designs have won numerous international awards and we have been awarded competitive contracts from significant public and private sector clients.

Our Work:

A broad range of FileMaker examples, samples, demonstration files, technical papers and other resources can be accessed from the NightWing Enterprises web site at the URL provided below. Other publicly available examples of our work are available in the form of specialised developer tools published via our web site.

We are flexible in our approach. We have knowledge and we are ready to share it with you. We are practical, goal focused and standards based, and we are ready to assist with your solution, system and support requirements.

* FileMaker Certified Developers are subject to rigorous external testing under the auspices of FileMaker Inc worldwide.
